

OWNER'S MANUAL —
Please read before using this equipment.

Thank you for purchasing a RadioShack 2X/4X Desktop Magnifier. Your magnifier carries a 2x main lens and a 4x inset lens to let you view objects at two or four times their normal size. The built in light lets you see objects even in the dark. Its folding stand makes it compact for storage and freestanding for easy, handsfree magnifying.

⚠ WARNING ⚠

Dispose of old batteries promptly and properly. Do not burn or bury them.

⚡ CAUTION ⚡

- Use only fresh batteries of the required size and recommended type.
- Do not mix old and new batteries, different types of batteries (stand, alkaline, or rechargeable), or rechargeable batteries of different capacities.
- If you do not plan to use the light for a week or more, remove the batteries. Batteries can leak chemicals that can destroy electronic parts.

INSTALLING BATTERIES

To power your magnifier, you need four AA batteries (not supplied). For the best performance and longest life, we recommend RadioShack alkaline batteries. ⚡

1. Unfold the magnifier and place it on the desktop with the battery compartment facing up.
2. Slide the battery compartment cover in the direction of the arrow to remove it.

3. Place the AA batteries on top of the ribbons as indicated by the polarity symbols (+ and -) marked inside the compartment.
4. Replace the cover.

When the light dims, replace the batteries. ⚠ ⚡

USING THE MAGNIFIER

3. To use the large, 2x magnifying lens, place the magnifier over the objects you want to magnify and look through the lens.

To use the small, 4x magnifying lens, hold the object you wish to magnify up close under the lens, until you can view the object clearly.

CARE

Keep the magnifier dry; if it gets wet, wipe it dry immediately. Use and store the magnifier only in normal temperature environments. Handle the magnifier carefully; do not drop it. Keep the magnifier away from dust and dirt, and wipe it with a damp cloth occasionally to keep it looking new.

If your magnifier is not performing as it should, take it to your local RadioShack store for assistance. Modifying or tampering with the magnifier's internal components can cause a malfunction and might invalidate its warranty.
